Gemini built a world of blocks. Could it help visitors find a workshop?

A 3D building test put Google’s new Gemini 4 Hydrogen to work. A workshop timetable gives your team a simpler way to test whether a page earns its place.

A Counter With No Clerk

MineBench asked Gemini 4 Hydrogen to build scenes out of blocks. Its existing viewer turned the model’s code into 3D scenes. The team could use 15 builds from 21 attempts.

A small arts centre can test the same idea with a workshop finder. Give a colleague both the new page and a plain timetable. Time how long it takes to find the right workshop and fee.

DATA AT WORK

An AI agent can run on your server and still send customer data out

The Line Through the Wall

Anthropic’s new private beta keeps the agent’s work history on company servers. A delivery test can show what still reaches the model provider.

Give the test system a made-up address. Check whether it appears in the request sent to the model.
