A better captioning tool can still get the name wrong

A short recording with two speakers can reveal which names, times and corrections ElevenLabs’ new Scribe v3 misses.

The Space Between Voices
AI-generated artwork · AI Boss Ltd

ElevenLabs’ Scribe v3 transcribes recorded speech. Independent testing found fewer word errors than the prior version. In a small test on synthetic Korean speech, the new version wrote some brand names in a different alphabet.

Before you assign a full captioning job, record a practice clip with a local place name and a corrected number. Check who said each line, then play the captions on a phone to check their timing.

TRAVEL AND OPERATIONS

The FAA lifted its ground stop. Was your flight ready to go?

The Gap in the Timetable
AI-generated artwork · AI Boss Ltd

A communications outage halted departures across the US on Friday. A travel desk needs a way to keep unconfirmed flight updates from reaching customers.

Ask the duty manager to write the next update when the airline feed stops changing.

THE CROSSWORD DESK

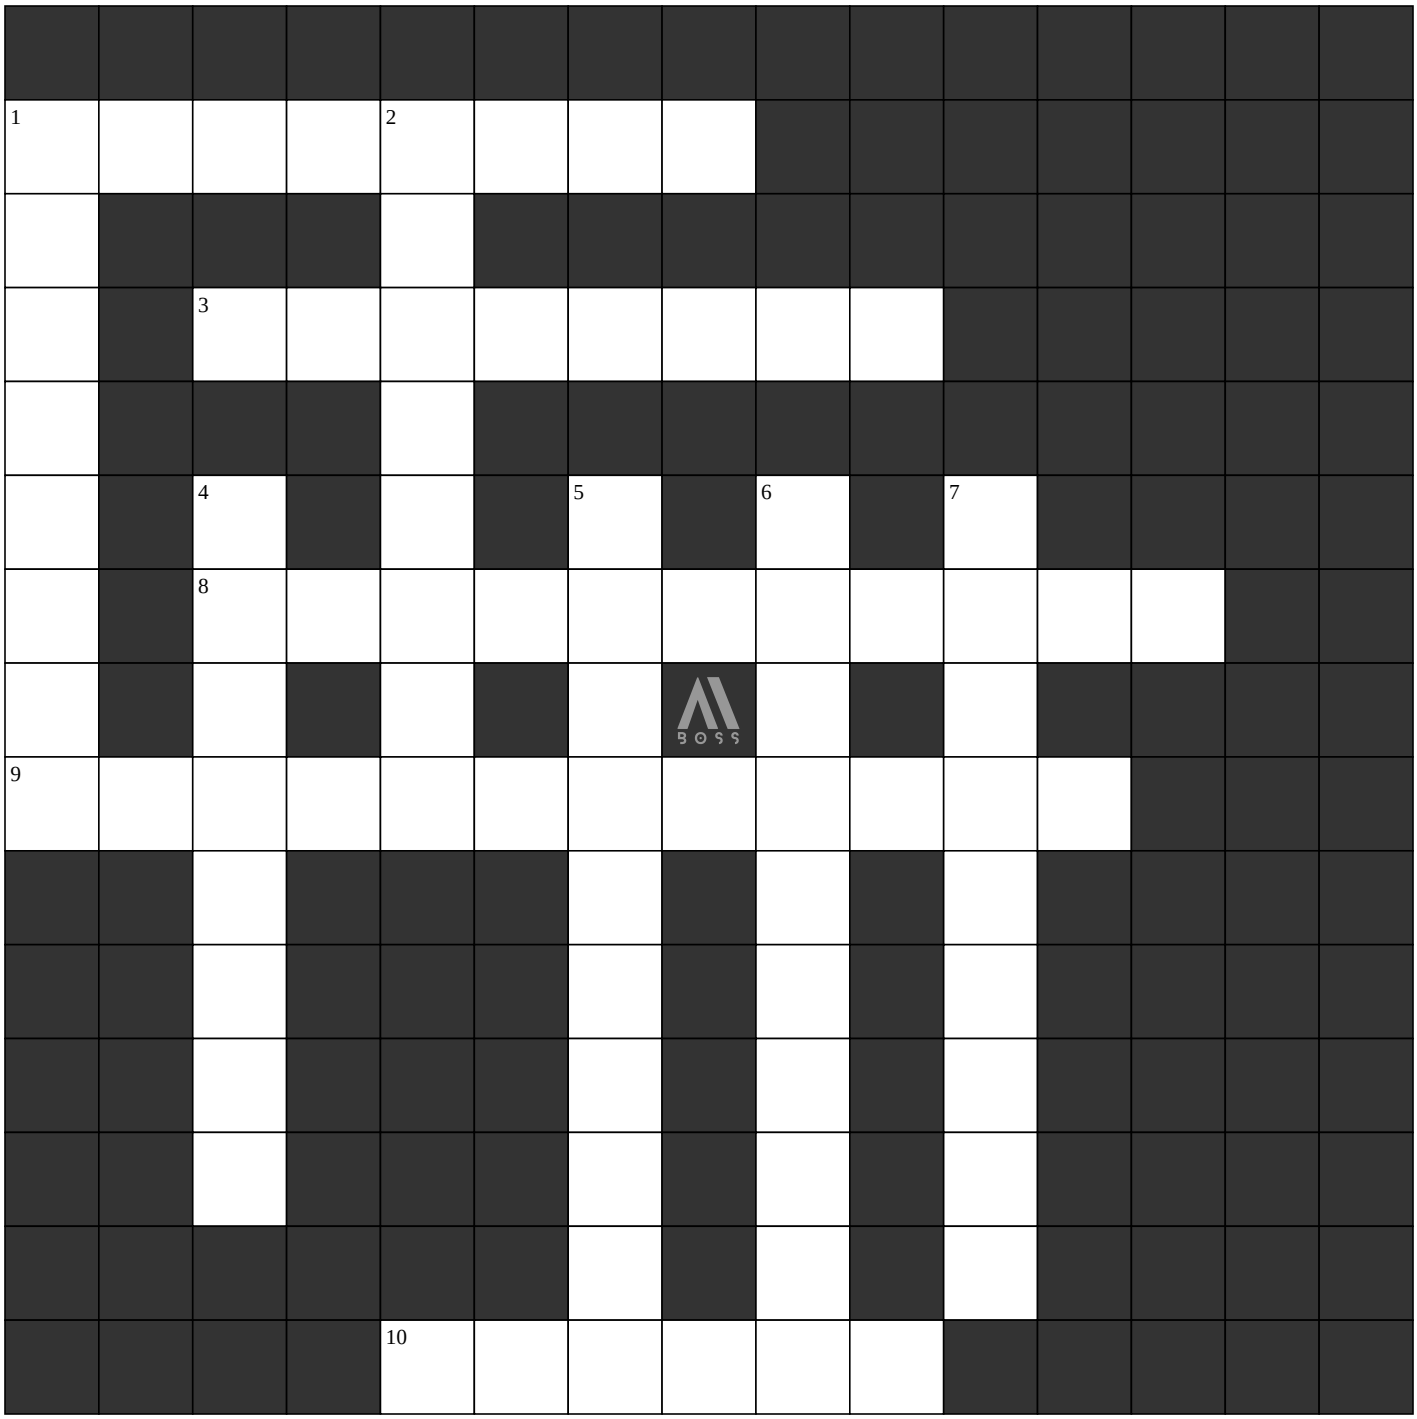

What did they say?

Practise AI vocabulary and judgement through workplace clues. Play the crossword or fill the grid with Quiz Mode at **aibosshq.com/games/daily/2026-11-14/**.

The printable puzzle follows on page 2. Its solution is on page 3.

Article sources and illustration credits appear with the full essays.

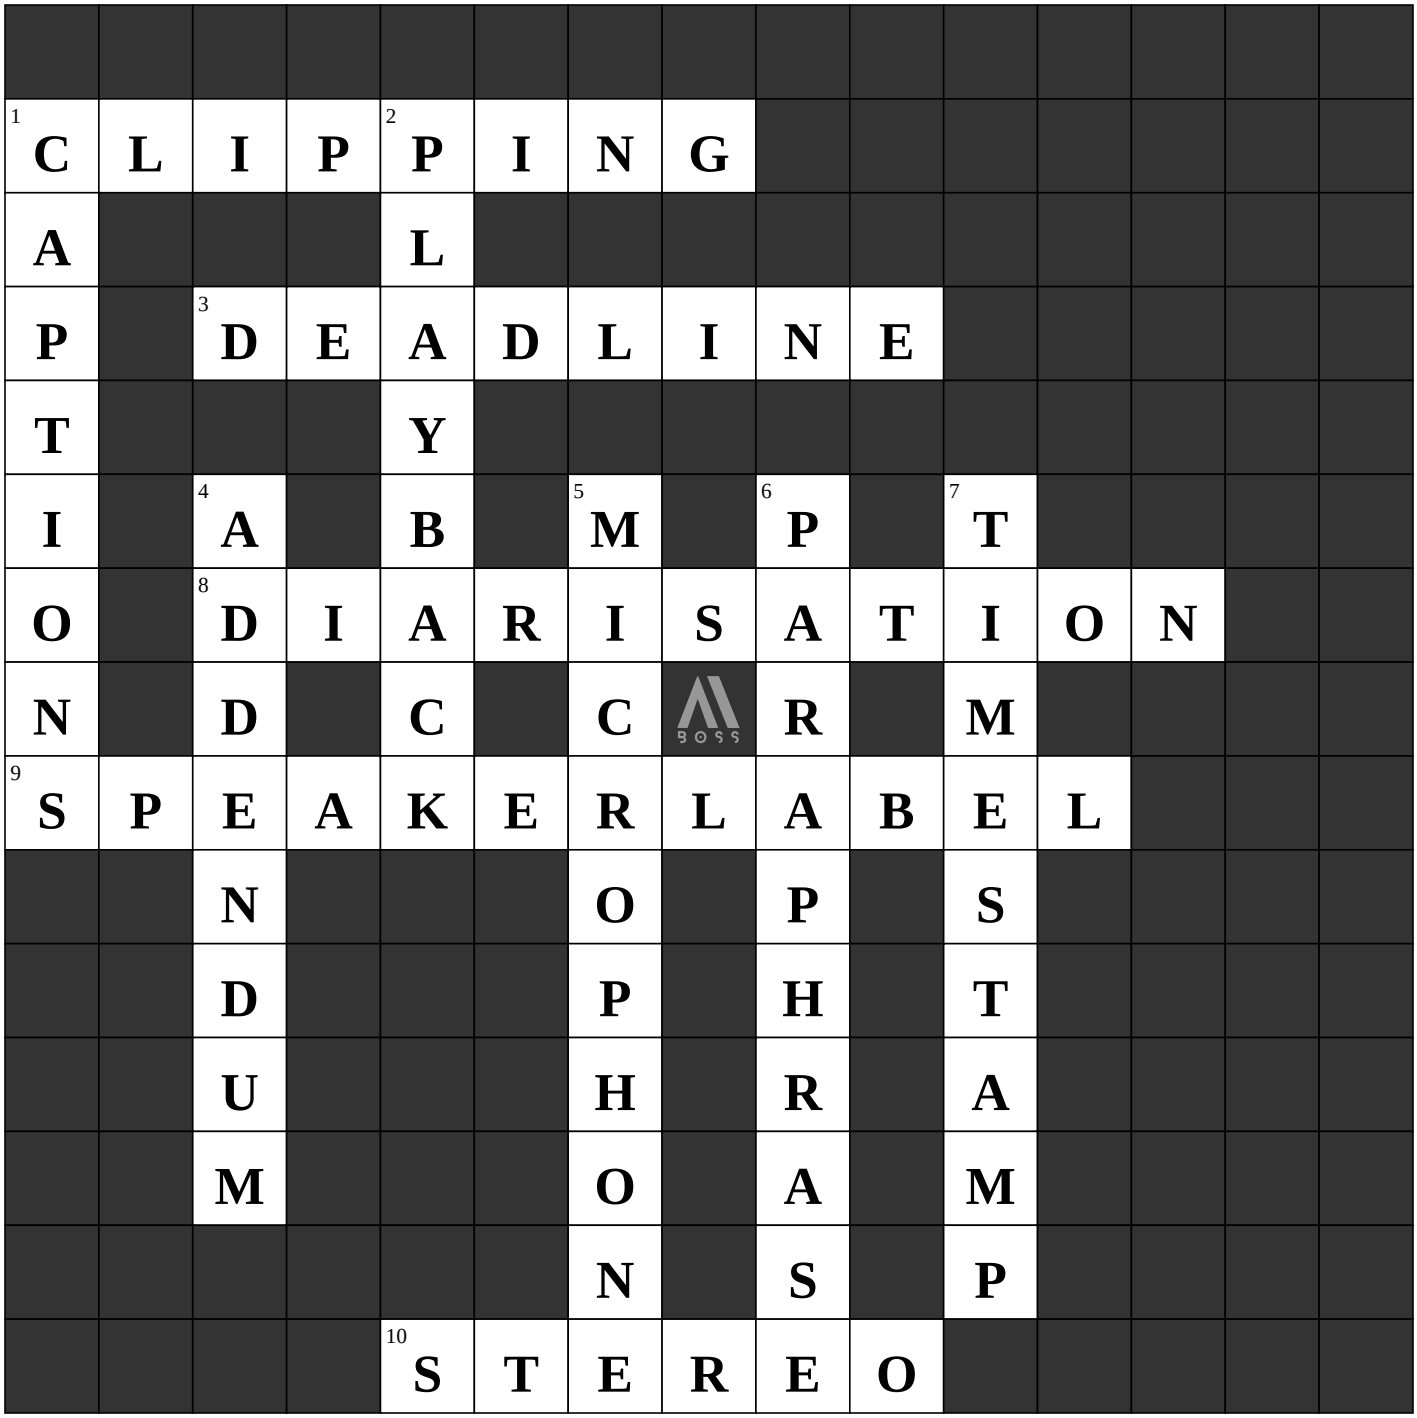

ACROSS

1. Distortion when a recording level exceeds its limit. (8)
3. Latest time by which a task must be done. (8)
8. Identifying turns by speaker in a recording. (11)
9. Text identifying who is talking in a caption. (12)
10. Sound with separate left and right channels. (6)

DOWN

1. Timed text for speech and meaningful sounds. (8)
2. Listening to sound after it was recorded. (8)
4. A note added at the end of a document. (8)
5. Device that turns sound into an electrical signal. (10)
6. Express the same meaning in different words. (10)
7. A time mark that locates a point in a recording. (9)
