What buyers should check before ChatGPT places an order

OpenAI’s Wallet is rolling out in the US. Caribbean teams can already test what a buyer needs to see before approving an order.

The Purchase Held at the Gate

OpenAI began rolling out ChatGPT Wallet to eligible US shoppers on 13 November. Buyers review items, the total and the card before approving a purchase. The payment network supplies substitute card details at checkout.

A small purchasing team can test the approval process without the Wallet. Compare two sample quotes, give someone a deadline and a ceiling that includes delivery and tax, then change the delivery promise at checkout. Check whether that person stops the order.

GitHub will drop several versions from its coding assistant on 16 November. Save a small test before moving a job to a replacement.

If your usual version disappears, a saved example can show which checks the replacement still passes.
