
ACROSS

1. An assistant flags conflicting safety instructions that the reviewer cannot resolve. What should the reviewer do to involve the responsible specialist? (8)

4. A team keeps the approved sources, review decisions and description of AI assistance with its final report. What traceable account has it created? (6)

7. A designer wants to reuse a restricted customer image in an AI-assisted campaign. What authorisation must be checked before reuse? (10)

DOWN

2. An assistant prepares a supplier message, but company rules require a manager to authorise it before sending. What must happen next? (8)

3. Before sharing an AI-written service guide, a supervisor checks every instruction against the current approved procedure. What action is this? (6)

5. An AI-assisted report is ready for release. The team names the person who will answer for its accuracy and use. What responsibility does that person hold? (5)

6. A consultant explains to the client that AI helped draft the report and that the consultant checked the final claims. What is this explanation of AI involvement? (10)

7. Before using staff records with an AI service, a manager checks whether that data is allowed in the approved tool. What concern is being addressed? (7)
