
ACROSS

1. AI drafts a price change notice. The pricing owner must agree before it goes to customers. What is still needed? (8)

4. A trainer tells AI who the lesson is for, what to produce and how to ask for missing details. Which D is being applied? (11)

7. A warehouse lead decides that AI can draft a stock summary while a person approves reorder decisions. Which D is about this division of work? (10)

8. A procurement officer checks an AI comparison for wrong prices, weak reasoning and unhelpful responses. Which D covers that evaluation? (11)

DOWN

2. A manager discovers the selected tool cannot read scanned pages. What capability boundary should change the task plan? (5)

3. A project update claims that delivery is complete. The reviewer asks for the accepted deliverable and client confirmation. What support is being requested? (8)

5. A branch manager adds the current procedure and customer issue to a request for an AI-assisted reply. What background is the manager supplying? (7)

6. A consultant checks tool permissions, explains AI involvement and accepts responsibility for the final advice. Which D connects these duties? (9)
